

Ariel Goldring

Newark, DE · arigoldring77@gmail.com · arielgoldring.dev · github.com/arigoldring

EDUCATION

University of Delaware, College of Engineering — B.S. Computer Science

Expected June 2027

University of Maryland Global Campus, Associate of Arts

May 2018

EXPERIENCE

U.S. Army / NJ National Guard

June 2017 – June 2025

Sergeant (E-5), Senior Team Lead

Worldwide · Lawrenceville, NJ

- Led teams of 4–30 personnel in field exercises, coordinating logistics and task execution under time-sensitive operational conditions.
- Designed a structured physical training program for 10 soldiers, reducing their APFT failure rate from 100% to ~20% through individualized planning and progress tracking.
- Operated tactical SATCOM systems end-to-end: site surveys, equipment setup, link establishment, and month-long uplink maintenance.

PROJECTS

Strahd Hub — *Solo Developer*

React · TypeScript · Supabase · Cloudflare Pages

github.com/arigoldring/strahd-hub · dnd-cos.pages.dev/#/demo

- Designed and deployed a full-stack campaign management app used by 2 D&D groups (~15 users), with shared inventory, spellbooks, maps, and NPC records under role-gated visibility.
- Enforced authorization in the database through 23 row-level security policies, so content hidden from players never leaves the server instead of being filtered client-side; isolated privileged fields in separate tables to prevent base-table leakage.
- Closed a privilege-escalation path by removing blanket UPDATE access on user profiles and routing every mutation through security-definer Postgres functions that constrain exactly which columns can change.

Tails of the Tower — *Producer*

Godot · Shipped to itch.io

- Managed timeline and scope for a 24-person dev team across 5 sub-teams (art, programming, design, music, writing), coordinating through leads to keep a semester-long project on track.
- Designed and ran 3 structured playtests; synthesized findings via Google Forms, spreadsheets, and visual summaries to drive design decisions.

Policy Lens — *Co-creator*

HenHacks 2026 · React · TypeScript · Gemini API

- Built a web app with one teammate that flags concerning clauses in any Terms of Service the user pastes or uploads.
- Implemented a context input (“I’m a photographer posting to Pinterest...”) and category filters (data sharing, arbitration, liability) so Gemini’s analysis is scoped to the user’s actual concerns.
- Owned the Gemini integration: prompt design, response parsing, and highlighting of flagged clauses.

LEADERSHIP & ACTIVITIES

University of Delaware D&D Club — *President*

August 2023 – June 2026

- Negotiated a policy exception with RSO administration to fund a shared D&D Beyond account, expanding simultaneous resource access for 40+ members beyond what physical copies allowed.
- Coordinated end-to-end logistics for annual Renaissance Faire trips for 40+ members (advertising, payment collection, ticketing, transportation) within university safety policies.

TECHNICAL SKILLS

Languages: TypeScript, Python, SQL, C#, HTML/CSS

Frameworks & Libraries: React, Vite, TanStack Query, Supabase

Databases: PostgreSQL — schema design, row-level security, migrations

Tools: Git, GitHub, psql, Cloudflare Pages, VS Code, Google Gemini API
